Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lary (5,156,150) in view of Leslie et al(Des.348,618 hereinafter Leslie).

Lary teaches a device as claimed including a top layer -10- a second layer -20- however the alpha numeric grid does not show a nipple location or an axilla. Leslie teaches a breast map including a nipple location and an axilla. It would have been obvious to one of ordinary skill in the medical arts at the time the invention was made to include the nipple and axilla markings as taught by Leslie with the device of Lary to improve the ability to repeatedly locate the lesion site due to the increased points of reference. The method is set forth in columns 3 and 4.

Claim 2 - the front of sheet -82- is considered the third layer having radio-opaque markings " focus here, with target".

Claim 6 - enclosure -70- is a leak proof bag.

Allowable Subject Matter

Claim 4 is allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest a breast mapping system including three layers including a detachable radiosensitive third layer including a graphical representation of the breast aligned to the top layer as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 5,002,735, 5,913,686, and 4,181,859 teach related mapping devices.
